Photo Side-by-Side Crack+ [Win/Mac]

Compare pictures side-by-side: Compute differences and similarities between two images or a whole set of them: Auto-view pictures with different extensions in the same image viewer: Features in Detail Show image differences: The application makes it simple to find the differences between two images. It can also analyze the images, possibly by the corners, edges, colors, etc. and notify you about the differences. Moreover, when you compare images with a texture, the algorithm can automatically recognize such regions and extract them for you, so you can really enjoy the difference between the two images. Compare images according to one of the following metrics: Color: The application can compare and compute the differences between a color spectrum of any of the images, by using the HEX, RGB or HSL color palettes. Size: The application can compare the size of the images as well. Similarity: If you have a set of images you want to know how they are alike, the application can compare them and compute the similarities (scale, rotation, translation, duplication, mirroring, etc.). Similar Images: The application can perform the same analysis but for the whole set of images in a directory. Import images from the Web: The application can open the images from a web site automatically. You can not only do this using the links that you usually see on the search engine page, but you can do this for any supported file format (e.g. BMP, ICO, JPEG, PSD, PNG, TIFF, TGA, PCX, CUT, XBM, DDS, GIF and HDR) that has been registered. Customizable transparency percentage: This feature makes the application most flexible. You can use it to view all the images at the same time with their respective transparency, or you can apply different transparency for each one. Moreover, you can choose if to display the original image with or without transparency, and whether the rest of the information (e.g. sizes, formats, etc.) should be displayed. Magnifying one or both images: You can magnify the images by 200% or 400% (or any percentage you wish). Browsing images: You can browse to the images location manually, or you can simply drag and drop them into the main window. Context menu integration: You can right-click a graphic file and send it to
